## OBJECTIVE

---

Software Engineer with 8 months of experience in ReactJS Development, seeking full-time Frontend Developer roles.

## EDUCATION

---

**Bachelor's of Engineering in Computer Science**, S.R.T.M University Nanded 2021  
Relevant Coursework: Data Structure, Algorithms, OS, Software Engineering Lifecycle, Agile Methodology

## SKILLS

---

<b>Frontend Skills</b>	Javascript, HTML5, CSS3, Typescript, NextJs, SCSS, ReactJs, Redux
<b>Backend Skills</b>	NodeJs, MongoDB, ExpressJs,
<b>Other Skills</b>	GitHub, OS, Data structure, Firebase, AWS S3, NPM, Webpack,ES6, React Native(Learning)

## EXPERIENCE

---

<b>Frontend Developer</b> Red Dot Innovative	Sep 2022 - May 2023 <i>Remote</i>
---	--------------------------------------

- Achieved a 30% improvement in application load times through optimized React components and backend API calls.
- Developed cutting-edge UI components using ReactJS, resulting in a 20% improvement in user satisfaction scores.
- Created responsive front-end interfaces with React.js for seamless user experiences.
- Implemented efficient back-end solutions with Node.js and Express, handling large data sets.
- Reduced server response time by 25% through the implementation of caching strategies.
- Collaborated with cross-functional teams, including designers and QA engineers, ensuring seamless integration of front-end and back-end functionalities.
- Identified and resolved critical issues, enhancing application stability and performance.
- Actively engaged in self-learning and staying updated with the latest industry trends and best practices in MERN stack development.
- Effective communicator, proficient in translating complex technical concepts to non-technical stakeholders.

## PROJECTS

---

**Chat Application.** The Chat Application project integrates React.js, Firebase, and SCSS to create a user-friendly platform for real-time communication. Firebase's real-time database enables instant messaging, while SCSS enhances the interface with sleek design and responsiveness. The system is designed for scalability, accommodating high user volumes without sacrificing performance. Security is ensured through Firebase Authentication, safeguarding user data. **Invoice Generator.** The Invoice Generator project leverages React.js, CSS, and Chakra UI to develop a streamlined platform for generating invoices. Reduced invoice generation time by 50% compared to manual methods, enhancing operational efficiency. Operated with 99% accuracy in invoice calculations, minimizing errors and discrepancies.
